

---

Today, we will introduce Kosakata Hangul, a free PDF that implements Hangul to demonstrate the rules of writing. The original idea of this project is to help students learn the basics of Korean calligraphy in a fun and interactive way. The PDF can be used by any learner who has an interest in learning how to write Korean characters such as high school students, college students, and adult learners at home or in school. After download and installation, you can easily open it on any computer or mobile device using Adobe Reader (or the equivalent). Kosakata Hangul was made by a group of graphic designers, linguists, and highly skilled calligraphers. In the early days of this project, we created a variety of activities so that users can learn how to write Hangul without any prior knowledge. We hope you have fun with it! In addition to Kosakata Hangul, we have developed an online course called "Korean Character Sort". It is a 43-lesson course that makes Korean character learning fun and interactive using Hangul pictures, Korean words and vocabulary in different levels, and fun games. And it contains the following contents: (1) Korean Character Sort (3 lessons) A set of picture cards with Korean words and vocabulary. Based on the difficulty level, the learner will be able to choose a card and type a word in a text box. If correct, a reward will be given to them through a crown icon. The learner can also change the difficulty level to practice writing for each other or their friends' levels. After completing each lesson, learners will have learned over 30 words from level 1 to 3. (2) Top 100 Korean Words (4 lessons) A database of over 100 commonly used words in Hangul. By choosing the card containing the word, learners can type in a text box, and then they can check whether it is correct or not. Moreover, if the learner chooses to change the difficulty level, they can choose a level from 1 to 3, and type a Korean word according to the level. Learners will be able to learn over a 1000 Korean words from level 3 to 4. (3) Korean Vocabulary List (4 lessons) A list of over 100 common vocabulary words. It is designed by adding 10 new vocabulary words every lesson. The learners will be able to solve 20 word recognition problems such as translation and writing notations for each lesson. Finally, "Korean Character Sort" contains a variety of Korean calligraphy masterpieces in addition to Hangul. These masterpieces are created by Korean calligraphers, who are categorized into various groups for beginners, intermediate levels, and advanced levels. The learners can try drawing the beautiful works of art with their own hands by following the color coded keys at the bottom of each page. Each lesson in "Korean Character Sort" is designed with easy-to-understand subtitles accompanied with voice in both Korean and English. Therefore, it is suitable for learners at home or in school who want to learn the basics of writing Hangul through both visual and auditory senses.
